Prince George's County Public Schools (PGCPS) invites students, families, and community members to attend one of three community meetings to share their input on how the district will prioritize future school construction and renovation projects.

Community input from the three meetings will be used in creating the MPSP report and the next Educational Facilities Master Plan (EFMP), which is used to develop the annual and six-year Capital Improvement Plans (CIP).

The PGCPS Department of Capital Programs will host the meetings in partnership with project partner Brailsford & Dunlavey. Representatives will provide an overview of the MPSP followed by small group discussions.

**Dinner and child care for school-aged children (ages 4 and up) will be provided free of charge.** Please call 301-952-6597 the day before the scheduled meeting to sign up for child care services.
